

# Chemical Storage Applications

With decades of industrial equipment experience, ASI can offer cost-effective solutions for all types of liquid and chemical storage applications. We will work with your engineers to develop an equipment solution for a custom process or modify an existing one. Additionally, we can design and fabricate tank and vessel solutions for a multitude of different application parameters and environmental conditions.

## Atmospheric Storage Tanks

- API 650, Appendix J
- Carbon Steel, Stainless Steel or Other Alloys
- Vents, Fill Lines & Level Accessories
- Heat Trace & Insulation

## Fiberglass Storage Tanks

- ASTM D3299 or ASME RTP-1
- Multiple resins based on fluid application
- Vents, Fill Lines & Level Accessories
- Heat Trace & Insulation

## Pressure Vessels

- ASME Section VIII, Div. 1 (U-Stamped)
- Horizontal or Vertical Construction
- Carbon Steel or Stainless Steel
- Internal Linings and Coatings
- Vents / Relief Valves, Fill Lines & Level Accessories
